New Storch Magnetics' Heavy-Duty Magnet Sweepers Cleans Up Ferrous Materials Quickly, Safely, And Efficiently

Wednesday, July 2, 2008 – Livonia, MI - Storch Magnetics introduces a new Magnetic Road Sweeper using either a permanent magnet or electromagnet for all types of vehicles including forklift or skid-steer mounted applications and/or can be towable by other vehicles to sweep all ferrous materials from industrial or commercial floors, roadways, construction sites and more. They are available in various magnetic strengths from standard to high intensity in both permanent and electromagnetic technologies.

Storch Engineers and Manufactures specials while standard heavy-duty Magnetic Road Sweepers are available in 4 ft., 5 ft., and 6 ft., 7 ft., and 8 ft. width models. The standard magnet for each model is 3 inches thick by 10 inches deep by width of the sweeper ordered. Magnetic sweepers easily sweep ferrous scrap from small to large bolts, nuts, shavings, shrapnel, chips, hammers, C-clamps and other hazardous materials reducing liability.

Standard sweepers have convenient release lever mounted on the side, and is engineered for a three-inch sweeping height with higher sweeping heights available. Sweepers are also available with a battery-operated hydraulic release that's conveniently remotely activated by the operator.

Storch Magnetics also offers a series of high-powered electromagnetic sweepers that use an on-board gas or diesel generator for skid steer and fork lifts. These units have a convenient on/off switch activated by the fork-lift operator. A nice feature with this system is that the generator that operates the electromagnet can also power hand tools.

Storch can build or retrofit magnetic sweepers for vehicles, snowplows, Hi-lo', tractors, plow trucks, military, commercial, utility, farm equipment and more. The permanent magnet may be actuated to release by using a hydraulic plow-lift mechanism.

Storch's magnetic sweepers are made from 304 stainless steel protective housing and are very robust. Compared to other competitors' standard units, they are a much more rugged unit and

built to outlast. The company prides itself in the ability to be flexible by engineering and manufacturing special and custom Magnetic Road Sweepers for unique applications.

Storch Magnetics has been a leader in Magnetic Product Applications since 1952. Storch provides magnetic slide conveyors, magnetic separators and filters, holding and lifting magnets, magnetic sweepers and specialty designed magnetic products. Storch is an ISO9001:2000 and woman owned WBENC Certified Company.
